EXPERIENCE

Accent Group Limited (3y+)

Robotic Process Automation Developer | 2021- Present

I currently work as an RPA developer at Accent Group - one of Australia's leading footwear and clothing retailers. With more than 900 retail stores and 30+ brands, Accent Group is a perfect place for automation.

At Accent Group, I am responsible for the entire automation life cycle:

- Discover:
 - Introducing departments to Robotic Process Automation
 - Capturing processes using Task Capture
 - Organizing them using Automation Hub
- Build:
 - Using UiPath Studio
 - UiPath Marketplace
 - Custom VB packages
 - Using PowerShell / Windows Scheduler
 - Cygwin / Linux scripts
- Manage:
 - Managing users and groups within Orchestrator
 - Looking after test and production environments
 - Windows / Linux Servers
 - SQL Databases
 - Third party applications (e.g. Alteryx)
- Run:
 - Attended / Unattended Robots
- Engage:
 - UiPath Apps

MyDeal (5y)

System Administrator & RPA Lead | 2016 - 2021

I have worked as a System Administrator and RPA Lead at MyDeal.com.au – one of the top Smart 50 companies in Australia for 5 years. My day to day duties included Implementing Robotic Process Automation solutions for different departments within MyDeal (e.g. Importing, Accounting/Fraud and Customer Service), using:

- UiPath to build, deploy and manage attended / unattended bots
- Python to scrape missing information
- VBA to process CSV files
- Maintaining Active Directory server:
 - Looking after user accounts
 - Writing Group Policies
 - Securing the network
 - Organising shared folders
- Managing Hyper-V servers:
 - Win Server 2019 – for testing SQL queries and RPA solutions
 - Ubuntu – for running a web server
- Maintaining workstations within the company:
 - Hardware upgrades e.g. RAM, CPU and HD/SSD
 - Software licensing e.g. Windows Server, Office 365 and Adobe Studio
- API Integration and Troubleshooting:
- Integrating supplier's: Shopify, WooCommence, Neto and Magento websites with our Data Provisioning System and CRM via API
 - Checking price and stock automation
 - Running test orders
